

TEACHER PACKET

Teacher packet — Curriculum

Project lab-dallas-ag · Unit curriculum · Generated 2026-08-09 00:48 UTC

Report id: teacher

Unit: curriculum

Dataset: lab-dallas-ag

Documents in this unit's folder list: 2

Punch list for **this unit only**. Course-wide Year-at-a-Glance, other clusters' gaps, and the full glossary live in the **first-pass** packet (output/FIRST-PASS.md).

1. My unit at a glance

- Title: Curriculum
- Days on the unit calendar grid: 2
- Elements confirmed in place: 0
- Filing flags (elements): 0
- Expected materials found: 0 · not in this folder: 8 · possible duplicates: 1
- Curriculum tier: **Weak** — Many expected materials or Hunter elements are MISSING. Blanks are the signal — not a failure of the auditor.

What this means for your unit

Binary status per expected slot, evidence-cited. **PRESENT** cites the file that fulfills it; **MISSING** cites the model's own reason for rejecting every candidate it considered.

Day	Expected	Status	Evidence
Day 1	Lesson content / slide	MISSING	no candidate elements were routed to this slot
	Exit ticket	MISSING	no candidate elements were routed to this slot
Day 2	Lesson content / slide	MISSING	no candidate elements were routed to this slot
	Exit ticket	MISSING	no candidate elements were routed to this slot
Unit supporting materials	Lesson plan	DUPLICATE	Agriculture- Plant Science Alternate Lesson Plan Template — resolve which is canonical
	Quiz	MISSING	No candidate contains an actual set of scored assessment items; 'Exit Ticket' is only a title, and other questions are discussion/engagement stems.
	Answer key	MISSING	No candidate provides correct answers or keyed solutions for any assessment.
	Rubric	MISSING	No candidate states scoring criteria, performance levels, or evaluation dimensions.

Day	Expected	Status	Evidence
	Worksheet	MISSING	Named student handouts (Note Sheet, soil handout, 3-2-1 Reflection, web diagram) are only referenced; no excerpt itself is the student work document.

Priority for this unit: Highest priority: pull or author Day 1 and Day 2 lesson slides and exit tickets—nothing was routed into either day slot, so the calendar has no teachable material yet. At unit level, resolve which Agriculture–Plant Science Alternate Lesson Plan Template is the canonical plan before treating either copy as the plan of record. After that, fill the remaining unit gaps from the same source or by authoring: a scored quiz with answer key, a rubric, and the actual student handouts that are only named in references.

Table is sourced directly from `layer1/findings.json` — every row traces to a specific finding, not restated prose.

Files in this unit (open these by name)

These are the curriculum files listed for this unit. On Google Drive they live in this unit's folder under `files/` with the same readable names — no hash ids.

- Agriculture- Plant Science
- Agriculture- Plant Science Alternate Lesson Plan Template

2. Materials I still need

Compared to what this unit's day grid expects vs what was found in the uploaded files for **this unit**. Decide: author, pull from another drive, or drop from the S&S.

- **Lesson content / slides** — 2 expected slot(s) not in this folder
- **Exit tickets** — 2 expected slot(s) not in this folder
- **Quizzes** — 1 expected slot(s) not in this folder
- **Answer keys** — 1 expected slot(s) not in this folder
- **Rubrics** — 1 expected slot(s) not in this folder
- **Worksheets** — 1 expected slot(s) not in this folder
- **Possible duplicates:** 1 (same role satisfied more than once — check `layer1/findings.json`).

3. My lesson plans — template check

Core parts: standards/objectives, materials/logistics, direct instruction, assessment checkpoint. Not a judgment of teaching quality.

- No lesson plans for this unit were checked by Layer 2 yet (none confirmed as `lesson_plan`, or Layer 2 not run).

4. Files that may not belong here

- No filing conflicts touching this unit.

5. What to ignore here

- Course-wide YAG / pacing and other units → `output/FIRST-PASS.md` (report `first-pass`).
- Overlap pair decisions that span many units → `layer1/REVIEW-QUEUE.md` (report `review-queue`).

Unit Plan (education-space inventory)

A discovery-filled Unit Plan for this unit lives beside this packet as `UNIT-PLAN.md` / `UNIT-PLAN.pdf` — same CTAT / Northwest ISD fields curriculum writers use. Blank = not found in uploaded materials.

Lesson Plan structure (test draft)

A discovery-filled lesson-plan plate (test draft) lives beside this packet as `LESSON-PLAN.md` / `LESSON-PLAN.pdf`.
Structure matrix first; blank = not found in uploaded materials.
