Curriculum

TEKS

§130.2. Principles of Agriculture, Food, and Natural Resources (10) The student develops technical knowledge and skills related to soil systems. (A) identify the components and properties of soils; (B) identify and describe the process of soil formation (11) The student develops technical knowledge and skills related to plant systems. (D) identify plants of importance to agriculture, food, and natural resources; Learning Goals: The students will be able to: Define agriculture and explain... _(Source: Agriculture- Plant Science Alternate Lesson Plan Template)_

Launch / Intro

Agriculture pathways.....How many are they? [_\(Source: Agriculture- Plant Science\)_](#)

How do we grow Plants? Write it down on a Sticky note then place inside the tree. [_\(Source: Agriculture- Plant Science\)_](#)

Soil is a common factor. What is soil? Is it dirt??? [_\(Source: Agriculture- Plant Science\)_](#)

Describe Instructional Activities

The Agriculture, Food, and Natural Resources (AFNR) Career Cluster focuses on the essential elements of life food, water, land, and air. This career cluster includes a diverse spectrum of occupations, ranging from farmer, rancher, and veterinarian to geologist, land conservation. [_\(Source: Agriculture- Plant Science\)_](#)

Agribusiness Animal Science Applied Agricultural Engineering Environmental and Natural Resources Food Science and Technology Plant Science [_\(Source: Agriculture- Plant Science\)_](#)

Definition of Agriculture Agriculture is a science, art, or practice of cultivating the soil, producing crops, and raising livestock and in varying degrees the preparation and marketing of the resulting products Today we will focus on the plant science side of agriculture. [_\(Source: Agriculture- Plant Science\)_](#)

Closure of Unit / Lesson

Question Stems: What is the importance of soil? What are the properties of soil? What is the difference between soil and dirt? Evaluate Activity Evaluate: (5-10 Minutes) Upon completion, have students complete the 3-2-1 Reflection handout over this lesson. Reference Worksheet: 3-2-1 Reflection | Evaluate: (5-10 Minutes) Upon completion, have students complete the 3-2-1 Reflection handout over this lesson. [_\(Source: Agriculture- Plant Science Alternate Lesson Plan Template\)_](#)

Unit Assessments

Summative Assessments

Exit Ticket [_\(Source: Agriculture- Plant Science\)_](#)

Writing Strategies

Materials Needed: Sticky Notes (1) Note taking device or journal Explore Activity Explain: (10-15 Minutes) Career Advocate will explain the Career clusters in agriculture, specifically in Animal Science using the interactive lesson. (Source: Agriculture- Plant Science Alternate Lesson Plan Template)

Horticulture Floriculture Please draw this in your journal. Deals with plants that are used for their beauty/fruit. Horticulture Floriculture Deals with the use of cut flowers or the flowers you would find in a floral shop. What are 3 things they have in common? (Source: Agriculture- Plant Science)

Question Stems: Prompt: How do we grow Plants? Explain Activity Explore: (20-30 Minutes) Students will take notes and collaborate in small groups Student Engagement Strategy / Resource: Students will document their understanding through the provided guided notes. Question Stems: What is the difference between Horticulture and Floriculture? Materials Needed: Sticky Notes (1) Note taking device or journal | Explore: (20-30 Minutes) Students will take notes and collaborate in small groups... Definition of Agriculture Agriculture is a science, art, or practice of cultivating the soil, producing crops, and raising livestock and in varying degrees the preparation and marketing of the resulting products Today we will focus on the plant science side of agriculture. (Source: Agriculture- Plant Science)

Plant Science The Plant Science program of study focuses on the science, research, and business of plants and other living organisms. It teaches students how to apply biology and life science to real-world life processes of plants and vegetation, either in laboratories or in the field. (Source: Agriculture- Plant Science)

Graphic Organizers

Lab Activity Let's check out what is in our soil on our campus. Please take out your Let's Find Out About Soil handout. You will need the following items: 1 spoon 1 ziplock sandwich baggie We will go outside and fill our bags $\frac{1}{3}$ of the way full. Please make sure you take soil samples where the soil is soft and not hard. It could break your spoon. After our soil collection Place your bag flat on the table so that the soil can take up most of the bag. Do not open the bag, you will feel and see... *_(Source: Agriculture- Plant Science)_*

Plant Systems Career Pathways Note Sheet Students will create a Venn Diagram comparing the two plant science careers. Student Engagement Strategy / Resource: Students will create a Venn Diagram in their notes comparing the two plant science careers. Plant Systems Career Pathways Note Sheet Question Stems: What is the Agriculture Food and Natural Resources Career Cluster? What are careers in Plant Science? How does Plant Science affect our daily life? | Explain: (10-15 Minutes) Career... *_(Source: Agriculture- Plant Science Alternate Lesson Plan Template)_*

Question Stems: What is the Agriculture Food and Natural Resources Career Cluster? What are careers in Plant Science? How does Plant Science affect our daily life? Extend Activity Extend: (20-30 Minutes) Students will complete the soil lab. Instructor will take students outside to an area where there is visible soft soil. Students will be able to fill their bag $\frac{1}{3}$ of the way up. Students will use their spoons to act like shovels. Once collection of soil is over, bring the students back inside... *_(Source: Agriculture- Plant Science Alternate Lesson Plan Template)_*
